

CVIP Project/Task List

Web Development

About CodersCave!

Introducing CodersCave – Where Tech Dreams Take Flight! We're not just an educational hub; we're an ISO certified and AICTE approved powerhouse shaping tech futures. Our programs are meticulously crafted for aspiring techies, blending real-world projects with the latest industry know-how. At CodersCave, you don't just learn; you evolve.

As a certified institution, we take pride in our commitment to quality. From mentorship to hands-on projects, soft skills development to career guidance – we've got it all. Join us, and let's not just talk about success; let's make it happen. CodersCave: Unleash Your Tech Potential!

CVIP Project Rules

LinkedIn Engagement:

- Share the explanation of your project or informative videos related to internship tasks on your LinkedIn profile.
- Enhance visibility by tagging CodersCave in your LinkedIn posts showcasing your achievements.

GitHub Repository Management:

- Create and maintain a GitHub Repository exclusively for the CVIP internship, utilizing the specified domain name.
- Ensure timely and organized upload of all project source codes to the designated Repository.

CVIP Project Rules

Profile Development:

- Regularly update the Experience section on your LinkedIn profile to reflect the skills and experiences gained during the internship.

Certification Eligibility:

- Successfully complete at least one task from both Phase 1 and Phase 2 projects to qualify for internship certification.

CVIP Project Rules

Code Integrity:

- Be aware that any identification of plagiarism within your code will lead to termination from the internship.

Letter of Recommendation:

- Attain eligibility for a Letter of Recommendation by successfully completing all assigned tasks in both Phase 1 and Phase 2 projects.

Active Participation:

- Actively participate throughout your tenure to maximize the learning experience and contribute positively to the internship community.

Internship process

01

Internship tenure starts.

02

Phase 1 project submission and phase 2 Preparation.

03

Phase 2 project submission.

04

Evaluation of Projects and Certification process.

Phase 1 Tasks

Duration : 15 Days

Normal Task: Portfolio Website

- Create a personal portfolio website that serves as an online resume and showcases the intern's skills, projects, and experiences. The goal is to have a clean, visually appealing, and responsive website that provides an overview of the intern's capabilities and achievements.

Golden Task: Create a Blog website of your own

- Create a personal blog website to share your thoughts, experiences, and insights on various topics. This website will serve as a platform to showcase your writing skills, and it will be an opportunity to experiment with web development technologies.

Phase 2 Tasks

Duration : 15 Days

Normal Task: Create a weather dashboard

- Develop a Weather Dashboard that allows users to quickly check the current weather conditions, as well as the forecast, for a specified location. The dashboard will utilize a weather API to fetch real-time weather data and present it in an easy-to-understand and visually appealing manner.

Golden Task: Real-time chat web application

- Develop a Real-Time Chat Webpage that allows users to engage in instant messaging with others in a dynamic and responsive environment. The goal is to create a user-friendly chat application that enables real-time communication between participants.

Additional Tasks

Duration : Internship Tenure period

Task 1: Build a basic e-commerce website

- Develop a fully functional E-commerce Website that allows users to browse products, add items to their shopping cart, and complete the checkout process. The website will provide a seamless and secure shopping experience, integrating essential features for online retail.

Task 2 : Build a travel itinerary planner

- Create a comprehensive Travel Itinerary Planner that allows users to plan and organize their trips by inputting destinations, activities, and dates. The goal is to provide a user-friendly platform for travelers to efficiently plan their journeys and keep track of their travel details.

**Thank you
very much!**
